

TRANSPORTATION TIPS TO CONSERVE

1. Choose a sustainable commute: (telework, public transit, walk) as much as possible and earn time off! Visit [traviscentral/clip](https://traviscentral.com/clip) for more info

2. Try teleconferencing or online collaboration: use tools such as Microsoft Teams or SharePoint instead of in-person meetings

3. Don't idle: idling is hard on the car, bad for the lungs of those nearby, and a waste of gas. If you are waiting for more than 90 seconds, turn the car off. Tip: Try parking in the shade to keep cool

4. Multi-purpose trips: plan ahead and combine trips, where possible, to maximize fuel and time efficiency

5. Vehicle right-sizing: choose the right tool for the job. Need to go off-road to inspect a job site, take the truck. Need to attend a meeting across town, try a hybrid or compact vehicle. Carpool when possible
